Azul Rubén Darío, 2014 La publicación de 'Azul', primer libro de un escritor nicaragüense de veintiún años se convirtió en el hito fundacional de la literatura modernista. Desde el enigmático título hasta la estructura de la obra, compuesta por cuentos y poemas, hacen de este volumen la obra más representativa del periodo modernista. Los críticos del época aseguraban que, con este poemario, Rubén Darío había dado un nuevo sentido del ritmo y de la sonoridad a la lengua española. The publication of 'Azul', the first book by a 21-year-old Nicaraguan writer, became the foundational moment for the modernist tradition in Spanish-language literature. From its enigmatic title to the work's structure, made up of stories and poems, it is the most representative work of the modernist period. Critics of the day were already convinced that with this collection, Darío had given a new sense of meaning and rhythm to the Spanish language.

Azul Rubén Darío, 2021-03-24 Azul... (1888) is a book of stories and poems by Rubén Darío. Written while the poet was living in Chile, Azul... has been recognized as a pioneering work of Hispanic Modernism that launched the career of a leading Latin American poet. Both experimental and traditional, Azul... blends Darío's concern over the sustainability of modern life with his abiding interest in the myths and magic of ancient cultures. Infused with classical symbolism, inspired by the myth and philosophy of Ancient Greece, Rubén Darío's Azul... bridges the gap between ancient and modern. Rather than focus on the differences between the two, he envisions the past as a living entity, allowing history and fantasy to coincide with the social realities of his time. In these poems and stories, fairies from the plays of Shakespeare appear alongside the working men and women of Latin America. Dreams coincide with a reality mired in poverty, labor, and passionless social climbing. Poets and port workers sing and die in a city of ghostly beauty. Azul... is less a book than it is an experience, and nearly a century and a half after its publication it remains one worth the taking. With a beautifully designed cover and professionally typeset manuscript, this edition of Rubén Darío's Azul... is a classic of Nicaraguan literature reimagined for modern readers.

Río Azul Richard E. W. Adams, 1999 Deep within the forest in northern Guatemala lie the ruins of Río Azul, a Maya city that reached one-third the size of Tikal. Discovered and partially explored in the early 1960s, Río Azul and the surrounding region were more fully investigated between 1983 and 1987 by an archaeological team led by Richard E. W. Adams. In this summary, Adams integrates the findings of field archaeologists with those of the epigraphers and art historians to recreate the life of this Maya city from the little-known Early Classic period. Remains in the Río Azul area date from 900 B.C. to A.D.

850. The data indicate that, unlike most Maya cities that have been studied, Río Azul was a frontier town, an administrative center, with alternating defense and trade outpost functions. About A.D. 385, the Río Azul region was conquered and the city founded by Tikal, serving as a Teotihuacan-linked garrison for that capital. Nearly all of the more than seven hundred structures found within Río Azul were erected between A.D. 390 and 530. Acres of pavement were laid down around some thirty complexes of residences, temples, and tombs notable for the brightly painted red hieroglyphs and murals on their walls. The elaborate complexes and sumptuous artifacts suggest a city with a heavy proportion of aristocratic families and retainers. Around A.D. 530, Río Azul appears to have been suddenly destroyed. The city was abandoned, then reoccupied--only to stagnate and finally collapse, like many other Classic Maya cities, in the late ninth century.

Excavations at Cerro Azul, Peru Joyce Marcus,2008-12-31 Recipient of the Jo Anne Stolaroff Cotsen Prize During the Late Intermediate period (AD 1100-1470), the lower Canete Valley of Peru was controlled by the walled Kingdom of Huarco. While inland sites produced irrigated crops, the seaside community of Cerro Azul, 130 km south of Lima, produced fish for the rest of the kingdom. Cerro Azul's noble families lived in large, multipurpose compounds with tapia walls. Their pottery had its strongest ties with valleys to the south, such as Chincha and Ica. During the course of excavation, the University of Michigan Project excavated two tapia buildings in their entirety, saving every sherd from every room, walled work area, feature, and midden. This remarkable volume is the final site report on the architecture and pottery of Late Intermediate
