Andy smokes, grills and roasts his way through beef, pork, lamb, venison, poultry and even goat as recipes range from exotic (tongue, ears and offal) to basic (how to grill a pork chop). The book will explain how to make bacon at home but also why you should be eating grass-fed beef, as opposed to feedlot. It will show you how to butcher a chicken at home but also explain how to best cook it. It is meticulously researched but presented in an approachable way. The end goal is to walk people through various meat recipes, sure, but also to strengthen the reader's relationship with their supply chain by asking them to consider if they really are happy with the status quo.
