**Indian Spices** Amit Baran Sharangi, 2018-03-21 This work comprehensively covers the production, processing and post harvest technology of Indian spices with an added focus on the history and uniqueness of this legendary regional product. Individual chapters describe the unique aspects of these spices and their production, post harvest technology and value addition, molecular breeding, organic farming aspects, climate change effects and bioactive compounds. Seasonal, preparatory, and storage conditions resulting in composition variations are explored. Indian Spices: The Legacy, Production and Processing of India's Treasured Export begins by outlining the historical legacy of Indian spices and describing the many aspects that make this product so unique and highly valued. The abundance and variety of these spices are also delineated. Further chapters focus on current research involving the production technology involved in production, management, harvesting and processing of Indian spices along with post harvest processes, storage and transportation. Important and effective trends such as molecular breeding for spice crop improvement, tissue culture, climate change impacts, organic spices, extension strategies and secondary metabolites receive dedicated chapters. A valuable aspect of this work is the presentation of value chains for these spices, with extensive research presented on the marketing and export of the product. With the shift from localized distribution networks to a fully globalized industry, this book comes at an important time of growth for Indian spices and will be of major value to any researcher with interest in the past, present and future of this product.

**Yvain** Chretien de Troyes, 1987-09-10 The twelfth-century French poet Chrétien de Troyes is a major figure in European

literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

**Rhizobiology: Molecular Physiology of Plant Roots** Soumya Mukherjee,František Baluška,2021-12-07 This book discusses the recent advancements in the role of various biomolecules in regulating root growth and development. Rhizobiology is a dynamic sub discipline of plant science which collates investigations from various aspects like physiology, biochemistry, genetic analysis and plant-microbe interactions. The physiology and molecular mechanisms of root development have undergone significant advancements in the last couple of decades. Apart from the already known conventional phytohormones (IAA, GA, cytokinin, ethylene and ABA), certain novel biomolecules have been considered as

potential growth regulators or hormones regulating plant growth and development. Root phenotyping and plasticity analysis with respect to the specific functional mutants of each biomolecule shall provide substantial information on the molecular pathways of root signaling. Special emphasis provides insights on the tolerance and modulatory mechanisms of root physiology in response to light burst, ROS generation, agravitrophic response, abiotic stress and biotic interactions.
