The Carbon Cycle T. M. L. Wigley, D. S. Schimel, 2005-08-22 Reducing carbon dioxide (CO₂) emissions is imperative to stabilizing our future climate. Our ability to reduce these emissions combined with an understanding of how much fossil-fuel-derived CO₂ the oceans and plants can absorb is central to mitigating climate change. In *The Carbon Cycle*, leading scientists examine how atmospheric carbon dioxide concentrations have changed in the past and how this may affect the concentrations in the future. They look at the carbon budget and the missing sink for carbon dioxide. They offer approaches to modeling the carbon cycle, providing mathematical tools for predicting future levels of carbon dioxide. This comprehensive text incorporates findings from the recent IPCC reports. New insights, and a convergence of ideas and views across several disciplines make this book an important contribution to the global change literature.

The Education Systems of the Americas Sieglinde Jorntitz, Marcelo Parreira do Amaral, 2020 This handbook focuses on and compares the education systems in the three Americas: North, Central and South America, and includes a chapter on most countries in the region. The chapters follow a common structure and include schematic diagrams of the structure of mainstream education from pre-primary to tertiary level. Each chapter starts with a description of the historical and social foundations of the education system from the post-World War II period up to today, including political, economic and cultural contexts and conditions. By highlighting important dates and structural decisions, the current education system can be understood as resulting from past developments. The first part ends with a description of the transitions to the labour market that are offered, and the way in which these are organized in the education system described. The second part consists of an overview of the institutional and organizational principles as well as the structure of education from pre-primary to tertiary level. It includes a focus on legislative bases and financial provisions for the education system and a description of the structure by using the ISCED-classification. It further includes information of the supply of human resources such as teachers and other educators. The third and final part of the handbook discusses selected educational trends and aspects. In this context, three topics are of particular interest: dealing with inequality, ICT and digitization activities, and STEM-related policies and programmes.
