Being Ethnographic Raymond Madden,2010-04-16 Full of practical 'how to' tips for applying theoretical methods - 'doing ethnography' - this book also provides anecdotal evidence and advice for new and experienced researchers on how to engage with their own participation in the field - 'being ethnographic'. The book clearly sets out the important definitions, methods and applications of field research whilst reinforcing the infinite variability of the human subject and addressing the challenges presented by ethnographers' own passions, intellectual interests, biases and ideologies. Classic and personal real-world case studies are used by the author to introduce new researchers to the reality of applying ethnographic theory and practice in the field. Topics include: - Talking to People: negotiations, conversations & interviews - Being with People: participation - Looking at People: observations & images - Description: writing 'down' field notes - Analysis to Interpretation: writing 'out' data - Interpretation to Story: writing 'up' ethnography Clear, engaging and original this book provides invaluable advice as well as practical tools and study aids for those engaged in ethnographic research.

The scenarios draw on the age-old tradition of story-telling, rather than using data projections, to explore the wider context of the AIDS epidemic, reflecting the complexity of the subject matter.
